Experience

Rooms to Go | Frontend Developer | May 2022 - Present

- Owning, documenting, and driving development of new features and components for roomstogo.com
- Defining schemas to query product data from Apollo GraphQL server.
- Building functional TypeScript components for the RTG Next.js microsites.
- Conducting technical interviews for prospective Front-End team hires.
- Translating Figma designs into high-quality, scalable code.
- Defining content types with Strapi and fetching data to render UI elements through the Strapi GraphQL API.
- Rewrote and upgraded the outdated Storybook UI component library for the RTG Design System, creating a demoable environment for RTG UI elements.
- Set up and configured a Figma MCP Server in Cursor for automatically generating design system components from Figma designs based on existing code patterns.
- Created detailed Cursor agent rules for the RTG frontend repositories.

Incident IQ | Software Developer Intern | June 2021 – August 2021

- Updated .NET unit testing suite for existing IIQ website code base; created new xUnit tests for IIQ's new permissions system.
- Added functionality for retrieving support ticket data from the IIQ testing website.
- Queried and modified data in IIQ test database with SQL Server Management Studio.

Motus Nova | Web Developer Intern | May 2020 – August 2020

- Created/redesigned several pages for the Motus Nova WordPress website, including the Home, About Us, Products, Media, Telehealth, and Technology pages.
- Designed UI and improved functionality of the Wifi Manager Electron app component of the Motus Home Software.
- Reworked UI of landing page and redesigned graph elements of the Motus Reports app made with Chart.js.

Projects

DreamyBot | April 2024

- Discord bot with multiple functionalities, including voice channel YouTube playback, TTS speech generation, ChatGPT text prompting, and image generation with DALL-E 3 and the FLUX.1 Stable Diffusion model.
- <https://github.com/ZacAllen/DreamyBot>

Sveltedex | March 2022

- A Pokemon encyclopedia modeled after the in-game Pokedex tool; created with Svelte as frontend framework and hosted with Firebase. <https://sveltedex.web.app> | <https://github.com/ZacAllen/sveltedex-app>
